

Nobuo Mimura President of Ibaraki University

Dr. Nobuo Mimura was granted a doctoral degree in urban engineering in 1979. He specializes in global environmental engineering and served as coordinating lead author of the Intergovernmental Panel in Climate Change (IPCC). He took office as president of Ibaraki University in 2014.

Message from the President

To contribute to the region's sustainable vitalization with unique education and research

Ibaraki Prefecture, located in the National Capital Region, is given a bountiful land and rich water environment, and also has rich and varied industries such as agriculture and manufacturing. With 5 colleges, Humanities and Social Sciences, Education, Science, Engineering, and Agriculture, Ibaraki University makes contributions to build a sustainable society through unique research and education. In particular, quantum beam science, taking advantage of the accumulation of facilities in the surrounding area, and adaptation science for climate change are our world-class strengths. We hope that many students from all over the world join us in research and education.

Where is Ibaraki University? Ibaraki University is located in Ibaraki Prefecture, facing the Pacific Ocean to the east and bordering the Tokyo metropolitan area to the south. We have campus locations in the Northern, Central, and Southern regions of the prefecture and we provide unique education and research opportunities by utilizing our own regional characteristics. **Fukushima** Izura Institute of Arts and Culture Daigo Seminar House Center for Astronomy **Prefecture** Frontier Research Center for Applied Atmic Sciences **Tochigi Affiliated Junior High School** Tokai Satellite Campus Mito Campus Affiliated School for Special Support Education Astsuta Sta. Education

Our educational goal is to nurture in students the ability to respond proactively to changes in 21st century and to forge their own paths to the future. To obtain our goals, we developed a diploma policy, curriculum policy, and admission policy. The diploma policy consists of five foundation academic skills and we are engaging in its educational activities.

Colleges

Diploma Policy

Large perspective of the world

Knowlege and skills in a speciality field

Problem-solving ability and communication skills

Attitude as a conscious member of society

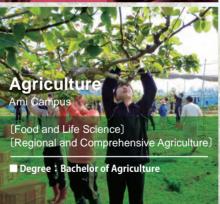

Focus on regional revitalization

Campus Facilities for International Students

International Lounge

International House for Overseas Residents

Student Dormitory

Graduate Schools / Diploma Course for Graduate Students

Humanities and Social Sciences Mito Campus

(Cultural Sciences)
(Social Sciences)

■ Degree : Master of Arts

Science and Engineering

Mito Campus, Hitachi Campus and Other Areas

Master's Program:

[Quantum Beam Science]

(Science)

(Mechanical Engineering)

(Electrical and Electronic Engineering)

(Urban and Civil Engineering)

(Computer and Information Sciences)

■ Degree :

Master of Science, Master of Engineering

Doctoral Program:

(Quantum Beam Science)

[Complex Systems Science]

(Society's Infrastructure Systems Science)

Degree

Doctor of Science, Doctor of Engineering

Doctor of Philosophy

Agriculture Ami Campus

(Agriculture)

■ Degree: Master of Agriculture

Education Mito Campus

Master's Program:

[Education of Children with Disabilities]

(Education for School Subjects)

(School Nurse Education)

(Clinical Psychology for School)

iOP : Ibaraki University's educational collaboration with regional and global partners

Ibaraki University offers a unique education system composed of an integrated off-campus study program named "internship off-campus program (iOP)" in addition to its standard quarter-based curriculum. The iOP program, offered during the 3rd quarter of the junior year, enables students to select from a variety of off-campus activities such as studying abroad, experiencing internships at corporations or municipalities, engaging in volunteer activities or conducting independent research or fieldwork for the entire quarter. Students can select, plan and undertake their iOP at any of Ibaraki University's partners institutions. This includes 60 partner universities worldwide, 50 reputable local companies and 40 municipal governments and regional organizations. The aim of the iOP is to provide a platform for students to hone their communication and problem-solving skills; a core competency that is required in today's rapidly changing world.

Hiroyuki Ota Executive / Vice President Ibaraki University

International Exchange Program

By communicating its educational and research outcomes widely to the international community and engaging in international exchange and joint research for students and faculty, Ibaraki University strives to promote education and academic research that is of an international standard, and to share the outcomes of that education and research with the world. It also aims to become a hub for academic and cultural exchange that is trusted by the international community, particularly in the Asian region.

International Exchange Program

ASEAN International Mobility for Students (AIMS) Program

AIMS program is an international joint education program based in Asia that came out of a joint student exchange support project by the Malaysian, Indonesian and Thai governments. Ibaraki University has participated in AIMS since 2013 aiming to improve students' language and communications skills and to develop people who will be able to engage with society with a global outlook.

Vietnam-Japan University Climate Change and Development Program

Vietnam-Japan University (Graduate School of Sustainability Science) is a new initiative being established with the participation and cooperation of multiple universities in both countries under an agreement between the Japanese and Vietnamese governments. It has been decided that Ibaraki University will be the convener university for the Climate Change and Development Program.

Overseas Internships

Ibaraki University offers its students overseas work experience and internship programs. Individual colleges also run their own overseas internship programs in their specialist areas in association with universities in various countries.

Partner Universities Exchange Program

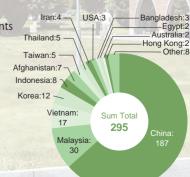

Ibaraki University has expanded a global network, forging close ties with universities worldwide and is committed to increase student mobility between its partner institutions.

Outgoing and Incoming International Students

Outgoing International Students (Academic Year of 2016)

Incoming International Students (As of May 1, 2017)

Research

Ibaraki University undertakes research with a whole university approach to promote interaction between colleges and various sectors, and to encourage an unique cross-disciplinary research. In Ibaraki Prefecture, there are unique research facilities such as Tokai Village with a group of nuclear related facilities and Tsukuba Science City, and research efforts in cooperation with these facilities are our global strengths.

Strategic Research

Deployment of Research to Form a Hub of Education and Research in the Area of Quantum Beam Science

This is an area of research that uses the experimental equipment at the Japan Proton Accelerator Research Complex (J-PARC) in nearby Tokai Village and other quantum beam experiments to undertake basic research and applied research for industry. In collaboration with nearby research institutes and prominent overseas research organizations, we aim to achieve research that is world-class.

Since its establishment in 2006, the Institute for Global Change Adaptation Science (ICAS) has acted as a hub for research and education into climate change adaptation science, undertaking research into impact assessment, technological development for adaptation and mitigation measures, and effectiveness assessment, and communicating its scientific findings to the world. We will further strengthen ICAS and deploy its outcomes regionally, to contribute to disaster mitigation and to the realization of a sustainable society.

Priority Research

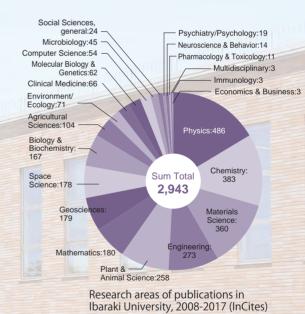

Radio telescope (Center for Astronomy)

Rokkaku-do by Okakura Tenshin (Izura Institute of Art&Culture)

- Organizational research on regional issues in areas like that rural or have nuclear power plants.
- Cross-sectional research with Primary and Secondary
- Research for next generation Gamma ray Observatory in partnership with National Astronomical Observatory and other universities.
- Research for innovation of regional industries by cooperation with JAEA, RIKEN, National Institute for Materials Science, and JAXA etc.
- Advanced research and education from agricultural production such as functional foods to distribution.
- Research on art and culture based on preservation of ruins related to Okakura Tenshin(Kakuzo) such as Rokkakudo in Izura shore.

Globalization and Research in Ibaraki University

"University" is an institution of higher education, which mainly deals with advanced academic research, and is deeply rooted in the history of social development. The era is the 21st century, and the world is rapidly transformed by ongoing globalization. With the rapid development of information/communication technology, the world has become very narrow and close. In a global environment, the process of knowledge and value creation changes dramatically, and its impact has a great influence on universities. Ibaraki University aims to become "a university that serves as a base camp for knowledge of community creation with worldwide strengths and characteristics". It covers a wide range of scientific fields such as humanities and social sciences, pedagogy, natural science, engineering, agriculture. In accordance with the "Research Promotion Policy", Ibaraki University promotes "strengthening research" as well as

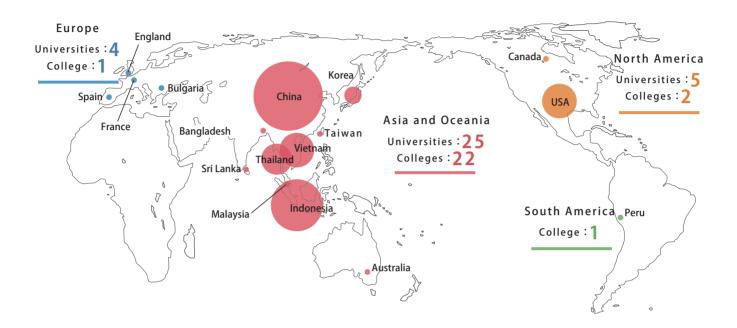

Hisaki Ozaki Executive / Vice President Ibaraki University

Facts & Figures

Academic Exchange Agreements with Foreign Universities and Colleges

Ibaraki University, as a bridge for international exchange, has partnership agreements with 60 universities and institutes in 19 countries and regions, through which we conduct academic and student exchanges.
